

CLAIMS

I claim:

1. An amusement device comprising:
 - an alcoholic beverage container shaped housing;
 - 5 a sound synthesizer in the housing;
 - a speaker in the housing and operably coupled with the sound synthesizer;
 - a power supply in the housing operably coupled at least with the sound synthesizer; and
 - 10 a motion responsive switch in the housing operably coupled to the synthesizer activation of the synthesizer.

2. The amusement device of claim 1 further comprising a microphone in the housing operably coupled with the synthesizer.

3. The amusement device of claim 1 wherein the synthesizer includes a random access memory configured to store, in electric form, an audible message transmitted through the microphone to the synthesizer.

4. The amusement device of claim 1 wherein a label is removably adhered over part of the housing.
